

## SHARWHA Deep Blue Fishing Charters

---

We leave Gansbaai harbour at a very slow pace, to take in the scenery. When we arrive at the point (close to where the Birkenhead sank), we start searching for fish on the different reefs that we have pin pointed on the GPS. Because we are looking for various species, we will experiment with different bait (choka, mussel, pike, red bait, pilchards etc.) While doing that we will give information about the area & answer any questions that might come up.

When the time arrives to go, we will come back slowly for the scenery & then finally we'll go into the new harbour & show our clients the various trawlers, other boats & also the black mussel farm they've got running in the harbour.

All the fish that have been caught may be kept by the client (keeping in mind the regulations of MCM)

We offer different packages to suit the client's needs
